ABOUT CLINICMANAGERPRO

One system for the whole clinic day.

ClinicManagerPro is cloud software that runs an Indian clinic from the front desk to the pharmacy shelf. Patients, appointments, consultations, prescriptions, billing, stock and follow-ups live in one record, set up for your specialty from the first day.

WHO IT IS FOR

Solo doctors

Run a one-doctor practice with far less paperwork.

Growing clinics

Several doctors, a pharmacy counter and a busy waiting room on one system.

Multi-branch groups

Every branch separate, with one owner view across all of them.

PROBLEMS IT SOLVES

Paper registers, sticky notes and scattered files	→	**One patient record that every desk and doctor sees**
Crowded reception and patients asking “how long?”	→	**A live token queue with a TV display for the waiting room**
Patients due for a review who never come back	→	**Automatic follow-up lists, so nobody is missed**
Bills written by hand, payments chased later	→	**Invoices drafted from the consultation, with online payment links**
Medicine stock that never matches the shelf	→	**Batch-wise stock, dispensed straight from the prescription**
Staff seeing more than they should, across branches	→	**Six roles and separate branch data, with one owner login**

Less admin. Fewer missed follow-ups. A clear view of your clinic.

Your team spends its time on patients, and you see what is happening in every room and branch.

WHAT IS INSIDE

One record. Every module.

Twelve capabilities that share a single patient record, so nothing is typed twice and nothing falls between desks.

01 Patients and consent

Registration with recorded consent, ABHA health ID, allergies and blood group.

02 Appointments

Booking against doctor hours, with change requests and emergency leave handled.

03 Live queue

Token queue with a secure TV display link and QR code for your waiting room.

04 Consultations

Notes in your specialty's format, locked once signed, with amendments on record.

05 Prescriptions

Printable prescriptions from a 1,530-drug database with favourites and autofill.

06 Services and packages

207 ready-made services: single visits, multi-visit plans, packages and courses.

07 Follow-up recalls

Automatic recall lists so patients due for a review are never missed.

08 Invoicing and payments

GST invoices drafted from consultations, numbered per branch, with online payment links confirmed automatically.

09 Pharmacy and stock

Batch-wise stock, goods receiving and dispensing straight from prescriptions.

10 Leads

Capture enquiries and move each one through stages to a booked patient.

11 Reports and dashboards

Role-based dashboards and reports for owners, doctors and the front desk.

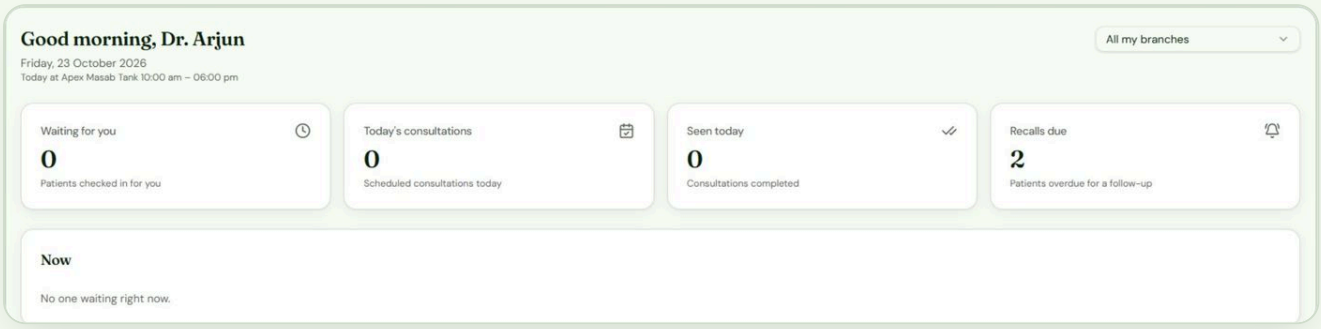
12 Team and branches

Six roles and a branch switcher, so everyone sees only what they should.

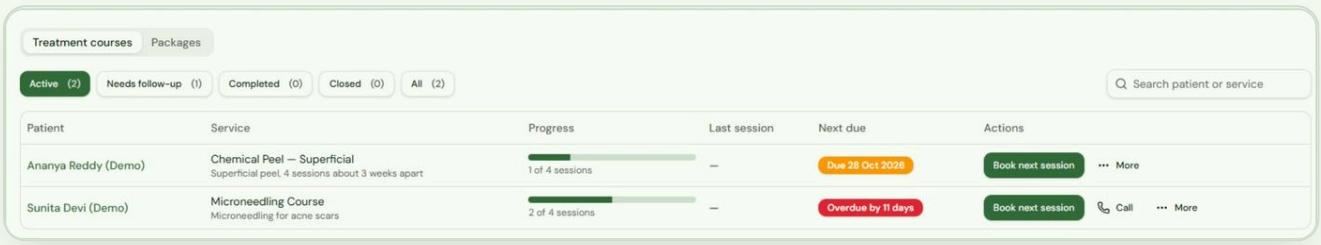
SEE IT IN ACTION

Screens your team will use.

Doctor dashboard. Today's queue, schedule and overdue follow-ups at a glance.

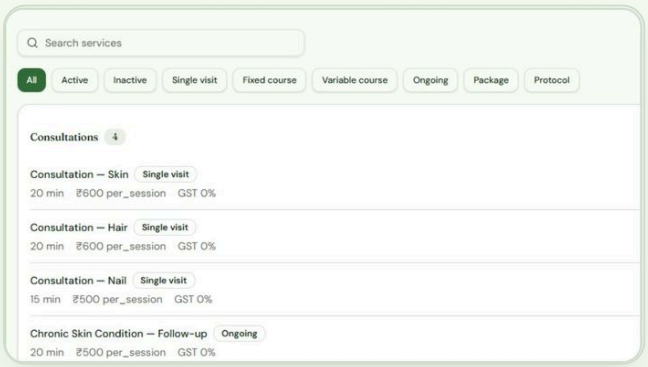


Treatment courses. Session progress, due dates and one-tap booking of the next visit.



Pharmacy dispensing. Prescriptions arrive ready to dispense, first-in, first-out.

Service catalogue.



Ready-made, then yours.

207 services come pre-loaded for your specialty. Change prices, durations and GST for your clinic.

Screens show a demo dermatology clinic with sample data.

BUILT FOR YOU

Ready for your specialty on day one.

Choose your clinic type at sign-up. The right modules, note formats, wording and service catalogue are set up for you.

General Clinic
GP, family medicine, walk-in

Dental Clinic
Dental treatments, oral health

Dermatology
Skin, hair, cosmetic treatments

Physiotherapy
Rehabilitation, movement therapy

Paediatric Clinic
Child and infant specialist care

ENT Clinic
Ear, nose and throat

Ayurveda Centre
Traditional holistic treatments

Orthopaedic
Bone, joint and muscle specialist

Your words, your clinic. Physiotherapy clinics see “client” throughout instead of “patient”, and every clinic type starts with its own note format and service catalogue.

Grows with you

- One login for one clinic or many branches
- Branch data stays separate; owners and admins switch between them
- Share a patient with another branch when care needs it
- Per-branch GSTIN, invoice prefix and invoice numbering

Safe by design

- Each clinic's data is kept apart by the database itself
- Patient data hosted in Mumbai, India
- Consent recorded for every patient
- Locked notes: changes are added as amendments
- Sign in with email or Google

PLANS

Simple plans that grow with you.

Every plan includes your clinic type's modules, note formats and service catalogue.
